

Signage

Signage for indoor areas

Posts with and without a sign holder on top

These cordons are used to guide people, to close off areas in an exhibition, or to manage visitors. The distance between the posts is 2m. A number of posts can be joined together.

These mobile inscription panels, of size A3, are highly versatile in use. They are ideal for signs for the small meeting rooms and for providing directions. They can be rapidly inscribed to suit individual requirements.
