e-Posters

Description

e-Posters can be used to supplement or extend the classical poster exhibition or as stand-alone posters. Authors can then hold poster sessions in separate rooms or directly in the exhibition.

The Congress Center Basel offers five e-Poster terminals as standard, with a 55" touchscreen display. Bigger numbers are available on request.

Technical information / handling

- 55" touchscreen
- Search function by code, title, content, author
- The e-Posters can be controlled directly via the touchscreen and with the remote control.
- Poster sessions: it is possible to program several poster sessions by different authors, each with different contents, on a priority basis. A search function gives access to all the posters saved at all times.
- Data upload: the contents are handed into the Speaker Service Center or the separate reception point for e-Posters. The posters can be uploaded in advance with prior programming.

Content / template

Resolution: full-HD 1920 x 1080 pixels, 16:9 as landscape or portrait format

Data formats: PDF, JPEG. PowerPoint (all functions), movies with sound can also be included in PowerPoint presentations (wmv or mp4).
